Setting Up Germ City Tent

1. **Open the storage case and duffle bag.** Set aside the extension cord from the storage case. Set aside the black fabric cover and black decorated interior panels, and mailing tubes containing the black lights and hand washing posters.

2. **Tent frame.** Open tent frame until fully extended, button on corners will click into place.

3. **Painted inside panels.** Use the velcro tabs at the top of the painted panel to attach the fabric panels to the tent frame. Face decorated side toward the center of the tent on sides A and C.

4. **Zippered side and door panels.** Attach **side** panels to tent sides A and C with velcro tabs at the top of each panel. Attach **door** panels to sides B and D of the tent with velcro tabs at the top of the door panels.

5. **Attach side and door panels together** 12-15 inches starting at the top corner. (You will complete attaching sides together after the tent poles are fully extended.)

6. **Black lights.** Remove the black lights and secure to the tent frame using work light hook, 2 velcro straps or 2 plastic cable ties per light. Lights on sides A and C work best.

**Velcro or
plastic
cable ties**

7. Plug black light into extension cord. (Place electrical cords away from walking path of participants, to prevent tripping hazards.)

8. **Center roof over top of frame.** Pull cover over each corner before pulling down completely.

9. **Extend tent poles.** Have a person at each corner. Place foot on tab at bottom of tent pole. Together, extend tent poles until buttons on poles click into place. (Make sure all poles are extended equally. If used outdoors, secure with stakes if the ground is uneven or area is windy.)
