

January 4, 2008

Hi-Tech Urban Solutions, Inc., a Honolulu Geovisualization firm, seeks a qualified person to complete GIS data conversion tasks. The person will use ESRI ArcGIS software to digitize storm water features from georeferenced construction as-built and design drawings. The candidate should be competent with ArcMap v9+ and have a basic understanding of GIS concepts. Familiarity with technical drawings is a plus.

Initially the position is temporary but may develop into longer-term employment. People with both part-time and full-time availability are encouraged to apply.

Compensation dependent on experience.

Interested applicants should send an email or resume to:
