## Natural Resources and Environmental Management

### Picture Yourself

- Developing conservation and nutrient-use plans to protect land against soil erosion and enhance water quality
- Managing recycling efforts for a city, firm, or enterprise
- Making decisions regarding the best uses of land when a town encroaches on farms
- Developing environmental impact statements
- Teaching high-school science and contributing to solving environmental problems with your students.

## Natural Resources and Environmental Management

### Natural Resources and Environmental Management (NREM)

offers an exciting new interdisciplinary Bachelor of Science degree devoted to the sustainable management of our environment and natural resources.

All students take a common set of 10 courses that provide a foundation in the natural sciences, apply natural and social science concepts within a four-year core sequence, and develop professional skills in quantitative methods, public speaking, cultural sensitivity, and mapping. Students also select one of the following tracks:

**Resource Management and Conservation**—focuses on the biological and physical science aspects and management of natural resource systems.

**Resource Development and Policy**—emphasizes the social, cultural, and economic aspects of managing natural resources and the environment.

### Work with Top Professors...

...and join an international, award-winning group that includes world-renowned foresters, soil scientists, hydrologists, ecologists, remote sensing scientists, and resource economists who are graduates of schools such as UC-Berkeley, UC-Davis, Cornell, Illinois, Stanford, and other top universities. Get to know and learn from these professionals in our small classes and through laboratory and field experiences.

### Use Cutting-Edge Technology...

...such as geospatial analysis and remote sensing, GPS animal tracking, greenhouse gas flux measurements, herbicide ballistic technologies, and participatory modeling tools and decision-support software.

### Team up with Award-Winning Students...

... recognized locally, nationally, and internationally for their achievements.

### Open Doors to New Careers and Opportunities

Follow the **Resource Management and Conservation** track and find employment as an erosion control specialist, environmental inspector, watershed manager, ecotourism manager, or science teacher. Follow the **Resource Development and Policy** track and work as an environmental policy analyst, an environmental compliance officer, or in community development.

### For Fun and Friends

The College of Tropical Agriculture and Human Resources has numerous student organizations that provide you with the opportunity to meet new friends with interests similar to yours and participate in social, community-service, and field-related activities. The University of Hawai'i at Mānoa campus is located in a lush tropical valley, only minutes away from mountain forests, coral reefs, and other natural habitats to enjoy.

### Are You Prepared?

Freshmen that meet UHM general admission requirements can be admitted directly to the **Natural Resources and Environmental Management** program. Students transferring from another program in the UH System or another university must have a minimum GPA of 2.5 for transferable credits. Prospective students are encouraged to contact the NREM advising staff early in their college program for assistance in selecting introductory courses and planning an individual course of study. To streamline a student's progress toward a degree, advising is mandatory for NREM majors.
