I learnt where mango and kenti grow. Mango and kenti are good to eat. We like when you came to our class.
I learned where all the vegetables come from and look like! Mrs. Kacy and Mrs. Kim taught me where the Papaya comes from and what it looks like. ✈️
I learned that bananas grow on trees.
Learning Fruit and Vegetable

Today in class Miss Kim and Miss Kaciya came to our classroom and showed us fruit and vegetables. One thing I learned of vegetables is corn and the other thing I learned of fruit is mango and that's all that I learned from Miss Kim and Miss Kaciya.
All "About Fruits and Vegetables"

Today Mrs. Kim and Mrs. Kacy show us about different plants and vegetables. They showed corn, banana, mango and a lot. They showed us where the vegetables and fruits grow. Thank you for coming to our class and taking picture with our class.
Thank you for the matching game and teaching us fruit and vegetables like corn, blueberry, carrot, cali flower and grapes. Corn comes from seed and Cali flower comes from flower, carrot comes from vines and grape from grape comes from vines too.
Fruit or vegetables.

One thing I learned was what different vegetables there are and if it is above or under dirt.

A carrot is under, a banana is in above, and a corn cob is above ground.
One thing I learned from the University of Hawaii is eating fruits and vegetables. The University of Hawaii showed where the fruits and vegetables come from.

After, we played a game where a fruit and vegetables come from.
I learned to eat healthy foods like grapes, mango, papaya, blueberries, corn, banana, and cole flower.

Love, Nathan

To Miss. Eddy, Miss. Emily
I learned that corn comes from plants. Corn is wrapped with leaves and the part that we eat is the seeds. The seeds are yellow.
I learned that corn is pollinated by the wind. Corn comes from plants. In the middle of the plant is the part that we eat.
Dear Ms. Kim and Mr. Kace,

Thank you for coming to our class. It was really fun seeing you. What I learned is a lot of different fruits and vegetables. The fruit and vegetables I have learned is that bananas grow from trees and carrots grow from underground where the roots are. Then once the carrots are ready you pull them out.

Sincerely,
[Signature]
Today I learned that blueberries grow on bushes and blueberries are sour when you eat them. Blueberries are blue and when you eat blueberries ripe, it tastes kind of sour.
I learned that corn comes from plants. Corn is a vegetable and they make you strong and healthy.
Fruit or Vegetables

One thing I learned was what different vegetables there are and if it is above or under the dirt. A carrot is under, a banana is above, and a grape is on a vine. Thank you for coming to our class!
What I learned.

I learned we're some fruits and vegetables grow. Like papaya grows on a tree and like a papaya, a mango also grows on a tree.
I also learned some vegetables grow in the ground. Like a carrot grows inside the ground. I learned we're eating the flower in the vegetable coleflower.
I learned that corn is pollinated from the wind and corn is a grain. Grapes grow from vines. Fruits and vegetables all grow on plants. Calliflower grows on or in bushes, but calliflower is white.

Thank you.
