

BANANA CULTIVAR NAMES AND SYNONYMS IN HAWAI'I
(excluding traditional *mai'a*)

MAIN CULTIVAR NAME IN HAWAI'I	PRINCIPAL SYNONYMS IN HAWAI'I & INTERNATIONALLY ¹			GENOME
SEEDLESS BANANAS				
"Apple banana"	A general name in Hawai'i for two types of closely related bananas: 1. "Apple, tall" or Brazilian, now called Hawaiian Apple and 2. the shorter Dwarf Brazilian or Santa Catarina. Neither is related to the "true" Apple banana, popular in Latin America and Asia, see Apple (true) or Manzano.			AAB
"Apple", dwarf	see Dwarf Brazilian/ <u>Santa Catarina</u> ²			AAB
"Apple", tall	<u>Brazilian</u> (tall) Brazil banana (obsolete, Hawai'i)	Hawaiian Apple Nuhōlani (obsolete, Hawai'i) <u>Pome</u>	Pisang Kelat Jambi "Tall apple"	AAB
<u>Apple</u> (true)	see Manzano			AAB
Bluefields	Ambon Chuoi Tieu Cao #2 Fa'i Palagi	Kluai Hom Thong / Dok Mai <u>Gros Michel</u> Guineo Gigante	Pisang Embun Pisang Ambon Siaine Fisi	AAA
Chinese	<u>Cavendish</u> China (obs. Hawai'i) Chuoi Tieu Lun <u>Dwarf Cavendish</u>	Dwarf banana Dwarf Chinese Enano Kluai Hom Khieo Khom	Mai'a Pake ^{1,3} Pisang Badak Pisang Serendah Sulay Baguio	AAA

<u>FHIA-03</u>	<u>Sweetheart</u>	<u>SH-3565</u>		AABB
<u>FHIA-18</u>	<u>SH-3480</u>	High Noon (in error)		AAAB
(FHIA) <u>High Noon</u>	<u>SH-3640.10</u> ⁵			AAAB
<u>Golden Aromatic</u>	Go San Heong			AAA
Golden Pillow (as yet unconfirmed presence in Hawai'i)				AB
<u>Grande Naine</u>	<u>"Chiquita"</u> ⁶ Chuoi Va Huong	<u>Giant Cavendish</u>	Pisang Ambon Jepang	AAA
<u>Green Red</u>	Akadah Cuban Yellow Colorado blanco Green Dacca	Green Macaboo Kluai Kung Khieo Manalele ⁴ <u>Morado Verde</u>	Moradong Puti Pisang Mundam/Telor Pisang Raja Udang Hijau <u>Rojo Verde</u>	AA
Hamakua ⁴	Buñgulan Embun False Lacatan	Jamaican Lacatan Kluai Hom Khieu/Kiau Monte Cristo	Pisang Ambon Lumut <u>Pisang Masak Hijau</u> Tall Cavendish	AAA
Hawaiian Apple	see "Apple", tall			AAB
"Hopa"	Tongan general term for Maoli, Pōpō'ulu or cultivars with characters of both groups			AAB
<u>Horn Plantain / Horn</u>	<u>Cuerno</u> Kiwipipi (obs. Hawai'i) Kluai Klai	<u>Macho</u> Pisang Byar Pisang Tanduk	Puerto Rican plantain Tindok Tondoc	AAB

MAIN CULTIVAR NAME IN HAWAI'I	PRINCIPAL SYNONYMS IN HAWAI'I & INTERNATIONALLY ¹			GENOME
Ice Cream	<u>Blue Java</u> Blue Lubin	Fa'i Pata Sina <u>Ney Mannan</u>	Pata Hina Lahelahe Pata Papalagi	ABB
Kahiki Cream ⁴	"cooking banana" ⁷ Cream	Green-trunked Kahiki ⁴ "Ice Cream" (in error)	Kahiki ⁴	ABB
Largo ⁷	<u>Bluggoe</u> "butter banana" Chuoi Ngop Lun "cooking banana" ⁷ "Ice Cream" (in error Hawai'i)	Pisang Kosta Kluai Hak Muk Khieo Matavia Pata (Tonga)	Pisang Abu Keling "plantain" San Juan Square cooker	ABB
Mai'a ⁴	General term for Hawaiian traditional bananas, not treated in this list. They include Iholena, Maoli & Pōpō'ulu groupings (Pacific plantains) plus Mai'a Hāpai, a sweet dessert banana. We only found 44 recorded (past & present), with 23 currently alive.			AAB + AA
<u>Manzano/Manzana</u>	Amorosa (true) <u>Apple</u> Chuoi Goong Custard apple	Go-Sai-Heong "Haole banana" Kluai Nam "Lady Finger" ⁹	Latundan ⁸ /Manila Pisang Raja Sereh (Pisang) Rastali <u>Silk</u> / Silk fig	AAB
<u>Monkey Fingers</u>	Chuoi Tieu <u>Crocodile fingers</u>	Morong Datu (Pisang) <u>Jari Buaya</u>	Saing Tudlo Tudló Datu	AA
<u>Mysore</u>	"Dwarf Waimea" Florida "Kahiki Hae" ⁴	Kluai Kai Ferang Misi Luki "lady finger" ⁹	Misi Peka "Pang" ¹⁰ Patele	AAB

MAIN CULTIVAR NAME IN HAWAI'I	PRINCIPAL SYNONYMS IN HAWAI'I & INTERNATIONALLY ¹			GENOME
<u>Pacific plantains</u>	General grouping for Pacific-wide cultivars traditionally used for cooking but some are delicious raw when very ripe. See <i>mai'a</i> .			AAB
<u>Pacovan Ken</u>	A new-&-improved cultivar, introduced from Brazil in 2007, very similar to 'Dwarf Brazilian'. It will no doubt be called "apple banana".			AAB
<u>Philippine Lacatan</u>	"true" Lacatan ¹¹			AAA
<u>Pisang Awak</u> ¹²	Awak Ducasse	Katali Kluai Namwa Luang	Namwa Pisang nangka	ABB
<u>Pisang Mas</u>	Amas Chuoi Trung	Kluai Khai "Lady finger" ⁹ Latundan ⁸	"monkey banana" ¹³ <u>Sucrier</u>	AA
<u>Pisang Raja</u>	Kluai Khai Boran #2	(Pisang) Radja(h)	<u>Raja</u> / Biu Raja	AAB
<u>Pitogo</u>	Enetlog / Nilanzon	Plátano Higo	Ugly banana	ABB
Plantain, Common	plátano / plántano monkey plantain Giant plantain	Horse plantain Horn plantain (in error, Hawai'i)	"Latin American plantain" Maricongo	AAB
Praying Hands	Binendito / Benedetta	Inabaniko	Ripping	ABB
Puerto Rican Dwarf Plantain	Plátano enano	Macho enano		ABB
Putalinga	Tongan Popo'ulu bananas, of which there are at least three in Hawai'i.			AAB

	See "Hopa"			
<u>Raja Puri</u>	-			AAB
<u>Saba</u> (#2)	'Opu-'ulu ⁴ Pisang Abu Nipah	Pisang Kepok / P. Kuning Turangkog	Chuoi Sap San Pabló	ABB/BBB
<u>Silver Bluggoe</u>	<u>Cenizo</u> (Sabang) Katsila Inahsio Pehsehs	Kluai Hak Muk Khao Pata sina / Pata Tonga Pisang Abu Perak	Pisang Kosta (Putih) Poro'ini rehu White Matavia	ABB
<u>Super Dwarf Cavendish</u>	Chinese Extra-Dwarf	Dwarf Parfitt	Dwarf Nathan	AAA
<u>Thousand Fingers</u>	Chuoi Tram Nai	Kluai Roi Wi/Wee	<u>(Pisang) Seribu</u>	AAB
<u>Valery</u>	"Chiquita" ⁶ Chuoi Tieu Xanh Congo	Pisang Ambon Putih Pisang Buai <u>Poyo</u>	<u>Robusta</u> Tudok	AAA
<u>Williams</u>	Chuoi Tieu Nho <u>Giant Cavendish</u> Giant Chinese <u>Gran Enano</u>	Harichal Kluai Khlong Chang Mons Mari Pisang Cina	Pisang Ambon Hijau Siaine Utin Wai <u>Williams Hybrid</u>	AAA
<u>Yangambi</u>	Ibota Iukombi	Kilometer 5 Kehuahi	Pisang Kipas <u>Yangambi Km 5</u>	AAA
SEEDED BANANAS				

MAIN CULTIVAR NAME IN HAWAI'I	PRINCIPAL SYNONYMS IN HAWAI'I & INTERNATIONALLY ¹			GENOME
<u>Abacá</u>	"fiber banana"	Maguindanao / <u>Manila hemp</u>	<u>Musa textilis</u>	-
<u>Balbisiana</u>	Balayang "Devil banana" Koana ⁴	<u>Musa balbisiana</u> Mai'a 'Oa ⁴ (in error, Hawai'i)	"seeded apple banana" (in error, Hawai'i)	BB
<u>Beccarii</u>	<u>Musa beccarii</u>	Ornamental red banana		-
<u>Fuzzy Pink</u>	<u>Musa velutina</u> Fuzzy banana Hairy banana	Hot pink banana Pink banana pink-fruited banana	<u>Self-peeling b. velvety (pink) b. velvet banana</u>	-
<u>Laterita</u>	Ornata Bronze (in error, nursery trade)	<u>Musa laterita</u> <u>M. ornata</u> (in error, Hawai'i)	Red Salmon	-
<u>Ornata</u>	<u>Musa ornata</u>	Flowering banana	Ornamental banana	-
<u>Red Abyssinian banana</u>	Ensete	Maurelii	<u>Musa ventricosum</u> <u>'Maurelii'</u>	-
Red-flowering banana	<u>Coccinea</u> <u>Musa coccinea</u>	Okinawa torch Red flowering (Thai) banana	Red torch banana Scarlet banana	-
<u>Rock banana</u>	Ensete	<u>Ensete superbum</u>		-
<u>Rowe Red</u>	a dwarf Zebrina			AA
<u>Zebrina</u>	Mai'a 'Oa / 'Oa ⁴ Blood banana	<u>Musa acuminata zebrina</u> Mai'a Poni ⁴	Sumatrana Variegated Red b.	AA

¹ Banana cultivars, being far below the species level, are highly variable due to genetic, environmental, geographic factors as well as length of time they have been isolated from the parent clone. Since very few cultivars have ever been morphologically described in detail, some "synonyms" may differ in slight details in different areas. Synonyms chosen for this table reflect Hawai'i's multiracial ethnic background. *We have tried assiduously to present only those which we have confirmed as correct. However, since all banana literature (particularly the Internet) is rife with errors, we have not been able to check every cultivar name overseas which is said to be synonymous with its Hawaiian equivalent. In addition, Hawai'i residents are grossly uninformed about banana cultivars; most know only "apple" bananas, and only then by taste.*

² Underlined names indicate standard international names. These may, or may not, be the main vernacular cultivar name in Hawai'i. Normally cultivar names are enclosed in single quotes; these are omitted here in the interests of space.

³ An old name in Hawai'i, still in use, pronounced "Pah-kay", the Hawaiian word for "Chinese"

⁴ Hawaiian names or the designation "Mai'a" have been given to several cultivars introduced to Hawai'i post-Contact: *fe'i* is probably the only one which likely came in ancient times. The remainder are in error.

⁵ FHIA bananas are experimental tetraploid bananas originating at the Honduran Agricultural Research Foundation, a government organization based in Honduras, Central America and the world leader in banana breeding. They are not genetically modified but bred conventionally to produce high tolerance or resistance to the major pernicious pests plaguing banana plants worldwide. The SH-(four numbers) cultivar designations indicate intermediate steps to the prime varieties, which are then given FHIA numbers and eye-catching marketing names.

⁶ "Chiquita" is a popular brand name given by United Fruit Co. for several cultivars in the Cavendish Subgroup, principally 'Grande Naine' and the taller 'Valery'/'Robusta'.

⁷ Two cultivars are called "cooking banana" in Hawai'i, principally the commonly grown 'Largo' but also the similar 'Kahiki Cream'. Both have fluffy sweet flesh when fully ripe and can be eaten raw.

⁸ On the Is. of Hawai'i, the name 'Latundan' is applied to both 'Manzano' & 'Pisang Mas'

⁹ "Lady finger" is a name which applies to many widely different cultivars and creates even more confusion than there is already. Of all the "lady fingers" introduced into Hawai'i, the main one retaining that name is Manzano. The name simply means that it is a cute little banana and of course, all over the world there are fruits which fit that designation!

¹⁰ Named after the later Jimmy Pang, enthusiastic collector of traditional *mai'a* in Hawaii's upland forests. This cultivar was named after him but in 2006 Kepler & Rust determined it to be a 'Mysore'.

¹¹ There are two look-alike "Lacatans" (both AAA): the "true" Philippine Lakatan and the False Lacatan from Jamaica (Pisang Masak Hijau, called Hamakua in Hawai'i). Both are quite rare and very susceptible to banana bunchy top virus, therefore are doomed in Hawai'i.

¹² "Pisang" means "banana" in the Malaysian and Indonesian languages

¹³ "Monkey banana" is a confusing name which applies to many small fruited varieties which monkeys might enjoy eating and which people use if they do not know the variety's correct name.

Haw'n Cv Synonym Table Aug 31 2007 Compiled by Dr. Angela Kay Kepler, Ha'ikū, Maui
