NREM M.S. Plan B Concentration Areas Course Listing

The following courses are approved for the four M.S. Plan B Concentration Areas. Petitions for course additions or substitutions to a given concentration area will be considered on an ongoing basis (to be submitted to the NREM Curriculum Committee via a student’s faculty advisor). When planning your courses, remember: (i) you need 18 total credits, with 9 credits from your specialization concentration area and 3 credits from each of the other three concentration areas; (ii) 12 of the 18 total credits must be NREM classes; (iii) no more than 12 credits are allowed from 400-level classes; and (iv) you have to complete required prerequisites (identified in parentheses after each course) prior to enrolling in a course.
