

Two Guides for Commercial Pesticide Applicators: *Rights-of-Way Weed Control* and *Turf and Ornamental Pest Control*

***Rights-of-Way Weed Control* teaches vegetation managers to**

- Recognize sensitive areas and organisms affected by herbicide applications, drift, and run-off
- Distinguish between annual, biennial, and perennial weeds
- Define the effectiveness and limits of cultural and mechanical management practices for weeds
- Differentiate among preplant, preemergence, and postemergence herbicide applications
- Explain the effects of soil texture, organic matter, and pH on herbicide activity
- Distinguish between grasses, sedges, and broadleaf plants
- Explain why growth stage affects weed management
- Develop a vegetation management plan for nutsedge, goosegrass, and other common weeds
- Explain nonchemical and chemical management methods for aquatic weeds

***Turf and Ornamental Pest Control* teaches pest managers to**

- Name and describe common insect pests of turf and ornamentals
- Describe ways of monitoring for insect pests using both passive and active sampling techniques
- Describe ways of managing insect pests of turf and ornamentals
- Name three requirements to sustain a disease and describe six ways to manage diseases
- Name and describe common diseases of turf and ornamentals
- Differentiate between infectious and noninfectious diseases
- Discuss ways of controlling weeds using nonchemical or chemical methods
- Explain five factors that may result in phytotoxicity
- Discuss management strategies for snails and slugs

These guides are intended to provide the basic information needed to develop pest management plans. Each has many helpful illustrations, space for notes, a glossary, review questions, and a useful table of conversions for pesticide applicators.
