The University of Hawai‘i is an equal opportunity, affirmative action institution.
The University of Hawai‘i trademarks are registered with the U.S. Patent and Trademark Office.
**Why Choose UH CTAHR and TPSS?**

CTAHR is internationally known for expertise in all facets of tropical agriculture. We have 10 research stations on all major Hawaiian islands, over 150 faculty, and students from around the world. Our alumni have gone on to top jobs in industry, research, education, extension, and government.

Immerse yourself in classes in plant breeding and biochemical genetics, agronomy, ecosystems management, soil science, vegetable and fruit physiology, nursery management, landscape design, horticulture, food science, and bioenergy.

Get practical experience in the field, conduct research in the laboratory, and meet with farmers to understand their challenges.

**For Fun and Friends...**

Join the Tropical Plant and Soil Sciences Undergraduate Society. You will make new friends with similar interests while hiking, visiting gardens, meeting with individuals in the various horticulture industries, raising plants, and other entertaining and educational adventures.

**Are You Prepared?**

To be ready for the Tropical Plant and Soil Sciences program, we recommend that you take the following courses in high school: biology, chemistry, algebra, trigonometry, and physics. If agriculture classes are available to you, they are useful for the Production and Management option. You should also work on developing your written communication, oral communication, and leadership skills.

Students transferring or planning to transfer from another institution, please contact one of the offices listed below for a list of required program courses, or visit our website.
