New Funding Opportunities
October 9, 2012

Aloha,

Here are some current funding opportunities that might be of interest to you. Please pass this information on to anyone else who could use it. If the deadline is too short for this year, it is still a good indication of the likely due date for next year. **Let me know if I can be of any assistance with developing and submitting a grant application.**

Sharee Pepper, PhD
Office of the Associate Dean & Associate Director for Research
College of Tropical Agriculture & Human Resources
University of Hawaii at Manoa
Honolulu, HI 96822
Phone: (808) 956-4556
Fax: (808) 956-6967
E-mail: spepper@hawaii.edu

For information on submitting grants electronically on grants.gov the following publication may be useful:

**USDA, NIFA Grants.gov Application Guide – A guide for the preparation and submission of NIFA applications via grants.gov:**

$ - USDA, NRCS, Commodity Credit Corporation - Conservation Innovation Grants: Adaptation to Drought Announcement for Program Funding (CFDA Number: 10.912)

Deadline: October 15, 2012

The Natural Resources Conservation Service (NRCS), an agency under the United States Department of Agriculture, is announcing availability of Conservation Innovation Grants (CIG) to stimulate the development, adoption, and evaluation of innovative approaches and technologies that enhance adaption to drought. Applications will be accepted from all 50 States, the Caribbean Area (Puerto Rico and the U.S. Virgin Islands), and the Pacific Islands Area (Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands). NRCS anticipates that the amount available for support of this program in FY 2013 will be up to $5 million. Applications are requested from eligible governmental or non-governmental organizations or individuals for competitive consideration of grant awards for projects between 1 and 3 years in duration.

$ - USDA, Rural Development - Value-Added Producer Grants (VAPG)

Deadline: October 15, 2012

The primary objective of the VAPG program is to help agricultural producers enter into value-added activities related to the processing and/or marketing of bio-based value-added products. Generating new products, creating and expanding marketing opportunities, and increasing producer income are the end goals of this program. Awards may be made for either economic planning or working capital activities related to the processing and/or marketing of valued-added agricultural products. You must be an Independent Producer, Agricultural Producer Group, Farmer or Rancher Cooperative, or a Majority Controlled Produced-Based Business to apply to this program. Approximately $14 million in competitive grant funds for FY 2012 is available to help agricultural producers enter into value-added activities. The maximum grant amount for a planning grant is $100,000 and the maximum grant amount for a working capital grant is $300,000. There is a matching funds requirement of at least $1 for every $1 in grant funds provided by the Agency (matching funds plus grant funds must equal proposed total project costs). Matching funds may be in the form of cash or eligible in-kind contributions and may be used only for eligible project purposes. You cannot use grant funds to purchase property or construct facilities, or to purchase equipment.

http://www.rurdev.usda.gov/BCP_VAPG.html

$ - USDA, NIFA, Western SARE - Professional Development Program Grants

Deadline: October 31, 2012

These grants focus on training agricultural professionals to help them spread knowledge about sustainable agriculture concepts and practices. PDP Grants are limited to $60,000 for single-state proposals, while proposals with meaningful involvement from more than one state can apply for up to $100,000. Grants can run for up to three years, with the final year to be focused
on project evaluation. Proposals will be reviewed by a technical panel in January 2013, and the Western SARE Administrative Council will select proposals for funding in March 2013.

https://wsaregrants.usu.edu/grants/docs/CFP_PDP.pdf

$ - National Research Council (NRC) of the National Academies - Research Associateship Programs (RAP)

**Deadlines:** May 1, August 1, November 1, 2012 & Feb 1, 2013.

The mission of the NRC Research Associateship Programs (RAP) is to promote excellence in scientific and technological research conducted by the U. S. government through the administration of programs offering [graduate](#), postdoctoral, and senior level research opportunities at [participating federal laboratories and affiliated institutions](#). In these programs, prospective applicants select a research project or projects from among the large group of opportunities listed on this website. Prior to completing an application, prospective applicants should contact the proposed Research Adviser to assure that funding will be available if their application is recommended by NRC panels. Once mutual interest is established between a prospective applicant and a Research Adviser, an application is submitted through the NRC WebRap system. Reviews are conducted four times each year and review results are available approximately 6-8 weeks following the application deadline. These awards include generous stipends ranging from $42,000 - $75,000 per year for recent Ph.D. recipients, and higher for additional experience. [Graduate](#) entry level stipends begin at $30,000. Detailed program information, including online applications, instructions on [how to apply](#) and a [list of participating laboratories](#), is available on the NRC Research Associateship Programs [website](http://sites.nationalacademies.org/pga/rap/). Questions should be directed to the NRC at 202-334-2760 (phone) or [rap@nas.edu](mailto:rap@nas.edu).

$ - NSF - ADVANCE: Increasing the Participation and Advancement of Women in Academic Science and Engineering Careers (ADVANCE) (NSF 12-584)

**Deadline Date:** November 8, 2012

For many decades, an increasing number of women have obtained STEM doctoral degrees, however, women, particularly women of color, continue to be significantly underrepresented in almost all STEM academic positions. While the degree of underrepresentation varies among STEM disciplines, women's advancement to senior professorial ranks and leadership roles is an issue in all fields. The underrepresentation of women is also a critical issue for the nation, at large, as its need to develop a globally competitive and diverse workforce increases. Research has shown that women's representation and advancement in academic STEM positions are affected by many external factors that are unrelated to their ability, interest and technical skills (Spencer, et al, 1999; Halpern and Tan, 2001; Hyde, 2005; National Academy of Sciences, 2007). Such factors include, but are not limited to: stereotype threat, societal impacts, organizational constraints of academic institutions; differential effect of work and family demands; implicit and explicit bias; and lack of women in academic leadership and decision-making positions. The cumulative effect of such diverse factors has been to create infrastructural barriers that impact the number of women entering, persisting and advancing in
STEM careers. Thus, the goal of the ADVANCE program is to develop systemic approaches to increase the representation and advancement of women in academic STEM careers, thereby contributing to the development of a more diverse science and engineering workforce. ADVANCE also has as its goal to seminally contribute to and inform the general knowledge base on gender equity in the academic STEM disciplines.

$ - The National Pork Board's General Call for Proposals for 2013 RFP

Deadline: November 13, 2012

Each year the National Pork Board solicits research proposals dealing with pork production (environment, swine health) and pork products (quality, safety & nutrition). The National Pork Board is soliciting research proposals dealing with:

ANIMAL SCIENCE - Animal Science
ANIMAL SCIENCE - Swine Nutrition
ANIMAL WELFARE - Animal Welfare
ENVIRONMENT - Air
ENVIRONMENT – Manure
HUMAN NUTRITION - Human Nutrition

PORK QUALITY - Pork Quality
PORK SAFETY - Pre-Harvest
PUBLIC-HEALTH - Public Health
SWINE HEALTH – General Swine Disease
SWINE HEALTH - Foreign Animal Disease

Please read carefully the individual solicitation descriptions for project proposals area at: http://www.pork.org/Research/499/ResearchRFP.aspx. If you have questions related directly to the description of a specific solicitation, contact the staff member listed in charge of the program. For RFP application information go to: http://www.pork.org/filelibrary/RFPs/GeneralCall2013.pdf. For questions on the submission process, contact Bev Everitt at beveritt@pork.org or 515-223-2750. URL: http://www.pork.org/Research/499/ResearchRFP.aspx

$ - U.S. Dept of State Title VIII Program, IREX - The Individual Advanced Research Opportunities Program (IARO) & The Short-Term Travel Grants Program (STG)

Deadlines: IARO – November 14, 2012; STG - February 6, 2013

IREX is pleased to announce that applications are now being accepted for the 2013-2014 Individual Advanced Research Opportunities Program (IAROL) and Short Term Travel Grants Program (STG). These innovative and flexible programs offer U.S. scholars and professionals the opportunity to conduct policy-relevant research in Eastern Europe and Eurasia. Researchers are able to increase their understanding of current regional issues, develop and sustain international networks, and directly contribute to the formation of U.S. public policy by conducting research on topics vital to the academic and policymaking communities. Fellowships provide international airfare, a living/housing stipend, visa support, emergency evacuation insurance, logistical support and, in many countries, field office support. Countries Eligible for Research: Albania, Armenia, Azerbaijan, Belarus, Bosnia and Herzegovina,
Bulgaria, Croatia, Czech Republic, Estonia, Georgia, Hungary, Kazakhstan, Kosovo, Kyrgyzstan, Latvia, Lithuania, Macedonia, Moldova, Montenegro, Poland, Romania, Russia, Serbia, Slovakia, Slovenia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan

IARO provides students, scholars and professionals with support to conduct policy-relevant field research in the countries of Eastern Europe and Eurasia. Master’s students, pre-doctoral students, postdoctoral scholars, and professionals with advanced degrees are eligible. Applicants must be U.S. citizens. For additional information and online application: Individual Advanced Research Opportunities Program (IARO), or contact at: iaro@irex.org, or 202-628-8188.

STG is a short-term, flexible program for postdoctoral scholars and professionals to conduct targeted, policy-relevant research in Eastern Europe and Eurasia. Postdoctoral scholars and professionals with advanced degrees are eligible. Applicants must be US citizens. For additional information: Short-Term Travel Grants Program (STG), or contact at stg@irex.org, or 202-628-8188.

$ - UH Sea Grant
Deadline: November 16, 2012 (Preliminary Proposal)
The University of Hawai‘i at Manoa Sea Grant College Program is requesting preliminary proposals for funding available beginning February 1, 2014 and ending January 31, 2016. Sea Grant supports an integrated program of applied research, outreach, and education addressing marine and coastal issues of public concern. Information generated by UH Sea Grant-funded research reaches stakeholders via UH Sea Grant extension, education, and communications activities in Hawaii and via the national network. Coastal and ocean literacy programs are supported at all levels. A typical award is $30,000/year but may range from $10,000 to $45,000 inclusive of indirect costs. Graduate trainees are funded separately; please see additional information at below URL (Graduate Trainee Requests). Proposals that integrate physical, biological, and social sciences toward addressing issues that are relevant to living sustainably along coasts and that engage in graduate student training will be especially encouraged. UH Sea Grant also encourages the submission of rigorous proposals from investigators in the social and design sciences, areas of research that have been historically under-represented in the past. The four UH Sea Grant Focus Areas for 2014-2016 are: Sustainable Coastal Development, Hazard Resilience in Coastal Communities, Sustainable Coastal Tourism, and sustainable and Safe Seafood Supply. Of particular interest this funding cycle and of critical importance to sustainability and self-sufficiency in Hawaii and the US central Pacific is research examining energy and water efficiency and production technologies, and conservation. UH Sea Grant is committed to ongoing enhancement of technology and information transfer of Sea Grant funded research results to stakeholders and relevant users. Toward this goal, a well-developed outline for extension and outreach activities is to be included in all proposals. Go to the Sea Grant College Program website for complete details at: http://seagrant.soest.hawaii.edu/sites/seagrant.soest.hawaii.edu/files/announcement/2012_rfp.pdf
$ - Gates Foundation - College Knowledge Challenge App Competition

**Deadline: November 16, 2012**

The [Bill & Melinda Gates Foundation](https://www.gatesfoundation.org) has provided $2.5 million to fund the College Knowledge Challenge, a competitive grant initiative for free and low-cost Facebook applications designed to make the college-going process more transparent, collaborative, and easy to navigate for low-income and first-generation students. The competition is administered in partnership with [College Summit](https://www.collegesummit.org) and other organizations. The challenge is open to for-profit and nonprofit organizations from any field. Developers are invited to submit technology solutions that support high school students and/or students currently enrolled in college (especially community college). Successful apps will address one or more of the top three roadblocks to college success by 1) helping students build, test, and implement personal academic pathways that grow out of college-career aspirations and are supported by informed decision making; 2) helping students build social capital and a college-going peer group; and 3) rectifying information asymmetries in college admissions, financial aid, and college selection processes that disadvantage low-income and first-generation students. A primary objective of the challenge is to move college support tools from simple Web sites that focus on information aggregation and basic FAQs to adaptive tools that provide students with personalized, actionable strategies for navigating through college. Investment funds will be distributed in grants of between $50,000 and $100,000, depending on the scope of the project. Approximately thirty winners will be funded. Winning apps then will be launched on Facebook as well as other platforms. Visit the College Knowledge Challenge Web site for the complete Request for Proposals and submission procedures. [http://www.collegeknowledgechallenge.org/](http://www.collegeknowledgechallenge.org/)

$ - UH Women’s Campus Club accepting grant applications

**Deadline: November 30, 2012**

The University of Hawai‘i Women’s Campus Club invites applications for funding of special projects for 2013. Proposals may be submitted by departments, organizations, programs, or by individuals associated with any of these on any of the University of Hawai‘i campuses. Priority is given to projects that benefit a large number of students, enhance the university community environment on any UH campus, and have not received major grants from the Women’s Campus Club in recent years. Requests should be concise, **not more than two or three pages**. Give clear goals and specific information on who will benefit from the grant, how it will be used, and a realistic line item budget. Items which can be realistically funded within a projected budget are more likely to be considered. Indicate if there are other sources of funding. Requests for individuals, salaries or wages, entertainment, food and travel will not be considered. Since grants are awarded on an annual basis and no funds are held in reserve, supplementary request cannot be funded. Grants for 2013 will be announced by February 2013 and funds will be released soon after that date. The average grant awarded was no more than $4,000. Forms for proposals can be found on the Women’s Campus Club website. Five copies of proposals can be mailed to **June C. Naughton**, Allocations Chair, Women’s Campus Club, P.O. Box 62104, Honolulu, HI 96839, or delivered to WCC, Bachman Annex 2 (UH Mānoa Campus Mail). For more information, e-mail **June Naughton** or call (808) 524-2718.
$ - USDA, NIFA, Western SARE - **Farmer/Rancher Grants**

**Deadline: December 5, 2012**

These one- to three-year grants are conducted by agricultural producers with support and guidance from a technical advisor. Individual farmers or ranchers may apply for up to $15,000, and a group of three or more producers may apply for up to $25,000. Producers typically use their grants to conduct on-site experiments that can improve their operations and the environment and can be shared with other producers. Grant recipients may also focus on marketing and organic production. A technical review will be held in January 2013, and proposals will be selected for funding in March 2013.

[https://wsaregrants.usu.edu/grants/docs/CFP_PG.pdf](https://wsaregrants.usu.edu/grants/docs/CFP_PG.pdf)

$ - USDA, NIFA, Western SARE - **Professional + Producer Grants**

**Deadline: December 5, 2012**

These one- to three-year grants are similar in concept to the Farmer/Rancher Grants with a few key differences. Instead of a producer serving as the project coordinator, an agricultural professional – Cooperative Extension educator or Natural Resources Conservation Service professional, for example – coordinates the project. A farmer or rancher serves as the project advisor. Applicants can seek up to $50,000 and must have at least five producers involved. A technical review will be held in January 2013, and proposals will be selected for funding in March 2013.

URL: [https://wsaregrants.usu.edu/grants/docs/CFP_PPG.pdf](https://wsaregrants.usu.edu/grants/docs/CFP_PPG.pdf)

$ - USDA, NIFA - **Ecology and Evolution of Infectious Diseases**

The program's focus is on both the discovery, as well as on building and testing models that elucidate these principles and processes. Research proposals should focus on understanding the determinants of transmission of diseases to humans, non-human animals, or plants; the spread of pathogens by environmental factors, vectors or abiotic agents; the population dynamics and genetics of reservoir species or alternate hosts; or the cultural, social, behavioral, and economic dimensions of disease transmission.

**Upcoming USDA/NIFA Grantsmanship Workshops**

**When: December 11, 2012**

At NIFA’s grantsmanship workshops, agency staff provide overviews of its competitive grants, including program goals and priorities; the grant evaluation process; and past funding statistics. Researchers, educators, extension specialists, and administrators are encouraged to attend. On December 11, 2012, NIFA national program leaders, in partnership with the University of North Carolina Agricultural and Technical State University, Greensboro NC, are offering the fourth in a series of 1-day national workshops covering the preparation and management of competitively awarded grants. In the past, this workshop series has targeted applicants to NIFA grant programs that involve systems-based approaches, transdisciplinary teams, and integrated research and extension, e.g., the Sustainable Agriculture Research and Education program, the Specialty Crop Research Initiative, the Organic Research and Extension Initiative, and the Organic Transitions Program. Because no other NIFA grantsmanship workshop has been scheduled this year, the NC A&T workshop will be broader in scope than others in this series. This year’s program will cover a number of new topics. New speakers will offer unique perspectives and dialog (via panel discussions) on thinking like a peer-review panelist, integrating research, education and extension, writing impact statements, and forming public-private partnerships and making them work. Audience participation will include both on-site and remote attendees. The program will be hosted on the NC A&T campus in Greensboro NC; however, remote participants will have the option of viewing a live webcast, or accessing an archived version for post-workshop viewing. Registration is free, but advance sign-up is strongly encouraged to aid planning. Space is very limited for those wishing to be part of the on-site audience. To view the agenda and register for the meeting, visit the NC A&T workshop website.

**USDA, NSF, NIH, NASA - National Robotics Initiative: The Realization of Co-Robots Acting in Direct Support of Individuals and Groups**

The goal of the National Robotics Initiative is to accelerate the development and use of robots in the United States that work beside, or cooperatively with, people. Innovative robotics research and applications emphasizing the realization of such co-robots acting in direct support of and in a symbiotic relationship with a human is supported by multiple agencies of the federal government including the National Science Foundation (NSF), the National Aeronautics and Space Administration (NASA), the National Institutes of Health (NIH), the U.S. Department of Agriculture (USDA) and others. The purpose of this program is the development of this next generation of robotics, to advance the capability and usability of such systems and artifacts, and to encourage existing and new communities to focus on innovative application areas. Two classes of proposals will be considered in response to this solicitation: 1) Small projects: One or more investigators spanning 1 to 5 years and range from $100K to $250K direct costs per year, and 2) large projects: Multi-disciplinary teams spanning 3 to 5 years and range from $250K to $1 M direct costs, not to exceed $1.5M total. The USDA encourages robotics research, applications, and education to enhance food production,
processing, and distribution that benefits consumers and rural communities. In the process, it is expected that projects will engage academia, industry, stakeholders/users, students, and other organizations to identify fundamental research needs and to conduct both basic and applied research, while providing training for the next generation of scientists, engineers, and technologists.

**$ - NIH - Basic social and behavioral research on culture, health, and wellbeing (R24)**

**Deadline: December 17, 2012**

This RFA encourages grant applications for infrastructure support to develop, strengthen, and evaluate transdisciplinary approaches and methods for basic behavioral and/or social research on the relationships among cultural practices/beliefs, health, and wellbeing. This includes an appreciation for more comprehensive understandings of the relationships regarding cultural attitudes, beliefs, practices, and processes, on outcomes relevant to human health and wellbeing. Model animal research teams are welcome to apply. OppNet intends to commit $1,425,000 in FY2013 for approximately 5-7 awards. Future year amounts will depend on annual appropriations.

- Document Type: Grants Notice
- Funding Opportunity Number: RFA-OAA-12-000036
- Opportunity Category: Other
- Posted Date: Sep 27, 2012
- **Current Closing Date:** Dec 21, 2012
- Archive Date: Jan 20, 2013
- Funding Instrument Type: Cooperative Agreement
- Category of Funding Activity: Agriculture
- Expected Number of Awards: 10
- Estimated Total Program Funding: $75,000,000
Agricultural research investments figure prominently in the Feed the Future initiative, and these investments link agricultural productivity, climate change, nutrition, enabling policies, economic growth, poverty reduction and sustainable natural resources management. The Feed the Future Research Strategy emphasizes a new paradigm of sustainable intensification to catalyze agriculture-led economic growth. It focuses on environmentally sustainable productivity gains through ‘research for development’ activities that are purpose-driven and impact-oriented, and that operate in close coordination with deployment of research outputs through extension, education, evaluation and feedback at the individual country level. This includes the integration of natural science and social science research, such as policy analysis, to increase impacts for developing world farmers. This RFA focuses on climate resilience, nutrition, and policy objectives under the Research Strategy, and welcomes applications in the following specific Program Areas: Program Area No. Program Area 1 High-Yielding, Climate-Resilient Legumes (two distinct opportunities: soy and other legumes) 2 High-Yielding, Climate-Resilient Cereals 3 Increased Livestock Productivity through Climate Resilience and Disease Resistance (two distinct opportunities: vaccine development and breeding/genomics approaches) 4 Small-Scale Irrigation Technologies and Agricultural Water Management Practices 5 Reduced Post-Harvest Losses and Food Waste 6 Food Security Policy.

http://www.grants.gov/search/search.do;jsessionid=hxp7QkZbQkQjHgO2zXnh15Qs02pPJ15IGTGv0cN5kJv0fX5JhraRmk!-48270356?oppId=202755&mode=VIEW

$ - EPA - Centers for Water Research on National Priorities Related to a Systems View of Nutrient Management

Deadline: January 15, 2013

The U.S. Environmental Protection Agency (EPA) as part of its Science to Achieve Results (STAR) program is seeking applications to establish Centers to conduct water research and demonstration projects that are innovative and sustainable using a systems approach for nutrient management in the Nation’s waters. This Request for Applications (RFA) is soliciting proposals that take a systems view of nutrient management. A systems view of nutrient management considers every potential link in the breadth of possibilities that may influence water quality. These involve societal and technological considerations and may include, but are not limited to: local resources, prevailing land uses, watershed health, manure management, energy costs, municipal wastewater treatment, in-building water reuse, or nutrient resource recovery. A systems view would also consider valuation of monetized and non-monitized possible co-benefits and consequences (e.g., decreased sediment runoff, improved recreational value) which may be part of a nutrient management program. Applicable Category(s): Grant/Fellowship Announcements URL: http://epa.gov/ncer/rfa/2012/2012_star_water_research.html
$ - UH Diversity and Equity Initiative

**Deadline:** October 5, 2012 & February 3, 2013

Promoting campus diversity and a climate of inclusiveness, diversity initiatives have been applied toward teaching, research, performance, trainings, workshops, visiting speakers, and through outreach and recruitment activities. Working with a review committee from the UH system, applications for the initiative is administrated by the Office of Student Equity Excellence and Diversity (SEED). For proposals requesting up to $5000: attach a narrative 5 pages or less. Include goals and objectives, method and evaluation of project and what area of diversity it addresses. Proposals that request $1000 or less: attach a 1 page narrative describing the project and the area of diversity it addresses. Revised guidelines and an updated application are available online. For more information, contact Pua Auyong.

http://www.hawaii.edu/diversity/dei/index.html

$ - USDA - Higher Education Challenge Grants Program

- **Document Type:** Grants Notice
- **Funding Opportunity Number:** USDA-NIFA-CGP-003954
- **Opportunity Category:** Discretionary
- **Posted Date:** Sep 27, 2012
- **Current Closing Date:** Feb 08, 2013
- **Archive Date:** Mar 10, 2013
- **Funding Instrument Type:** Grant
- **Estimated Total Program Funding:** $4,770,000
- **Award Ceiling:** $750,000
- **Award Floor:** $30,000
- **CFDA Number(s):** 10.217 -- Higher Education Challenge Grants
- **Cost Sharing or Matching Requirement:** Yes

Projects supported by the Higher Education Challenge Grants Program will: (1) address a State, regional, national, or international educational need; (2) involve a creative or non-traditional approach toward addressing that need that can serve as a model to others; (3) encourage and facilitate better working relationships in the university science and education community, as well as between universities and the private sector, to enhance program quality and supplement available resources; and (4) result in benefits that will likely transcend the project duration and USDA support.

http://www07.grants.gov/search/search.do?&mode=VIEW&oppId=202733
$ - USDA, NIFA, Western SARE - Sustainable Agriculture Tour Grants

Deadline: applications accepted year round

Sustainable Agricultural Tour Grants are funded for only one year. Any agriculture/natural resource professional in the Western region may apply. These professionals are cooperative extension educators/agents and specialists, USDA-NRCS field staff, agricultural consultants, nonprofit staff members or other agricultural professionals assisting producers at the local level. The grant applicant’s institution and or organization are fiscally responsible for the project. These grants are offered as a cost reimbursable contract. Applicants are required to have at least one past or current Western SARE-funded project as part of the tour. Preference will be given for the more Western SARE-funded projects visited. The maximum amount per grant application is $2,000. These grants are to provide opportunities for producers to:
• Interact and network with producers, and
• Assist producers in adoption of sustainable agricultural production.

$ - NSF - Tribal Colleges and Universities Program (TCUP) (NSF 12-568)

Full Proposal Accepted Anytime for Planning Grant Proposals, Broadening Participation Research in STEM Education Proposals, and Catalyzing Opportunities for Research and Education Proposals

The Tribal Colleges and Universities Program (TCUP) provides awards to Tribal Colleges and Universities, Alaska Native-serving institutions, and Native Hawaiian-serving institutions to promote high quality science, technology, engineering and mathematics (STEM) education, research, and outreach. TCUP-eligible institutions are predominantly two-year and community colleges. Support is available to TCUP-eligible institutions (see the Additional Eligibility subsection of Section IV of this solicitation) for Planning Grants, Instructional Capacity Excellence in TCUP Institutions (ICE-TI), Broadening Participation Research in STEM Education (BPR) Projects, Targeted STEM Infusion Projects (TSIP), and Catalyzing Opportunities for Research and Education (CORE). Through these mechanisms, along with collaborations with other National Science Foundation (NSF) units and its work with other organizations, TCUP aims to increase Native individuals' participation in STEM careers and the quality of STEM programs at TCUP-eligible institutions. TCUP strongly encourages the inclusion of activities that will benefit veterans. More information at: [http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5483&WT.mc_id=USNSF_39&WT.mc_ev=click](http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5483&WT.mc_id=USNSF_39&WT.mc_ev=click)
